WINTER ROAD CONDITON DEFINTIONS

GREEN

GREEN: No safety threat to the public due to weather conditions. Proceed with normal operations.

AMBER

AMBER: Difficult to hazardous road conditions. Drivers must slow to 10 MPH below the posted speed limit to maintain traction and a safe stopping distance. Roads are icy or snow packed, but clearing operations are making roads passable.-If applicable---Weather forecasts are predicting more precipitation which would prevent road clearing operations from keeping priority number 1 roads open. Temperatures are expected to reach below 26 degrees making cinder spread ineffective. Snow drifting is expected.

RED

RED: Most intersections present difficult or NO stopping conditions. Weather forecast calls for continued precipitation with below freezing temperatures. Clearing operations have not kept priority number one roads easily passable. Black ice or ice sheeting has made passage hazardous. XX inches of snow are packed on roads and are icing over. Driving above 10-15 mph causes vehicles to lose traction and safe stopping distance are significantly increased.

BLACK

BLACK : Restriction of all vehicular traffic on FLW. Emergency vehicles are unrestricted (MP's, ambulance, fire truck, DPW and SNAIR Support Team mission essential vehicles). Non-emergency vehicles must obtain approval from CG (Commanding General) or Authorized delegated Officer. POV travel will be restricted to mission essential personnel only.

Contact Range Operations at 596-2525 for Training Areas and Ranges impacted.

Contact LRC at 596-0814 for guidance/updates on TMP Troop Transportation.

Contact G-33 at 528-0798 or 573-855-1846 for guidance/updates on Water and Ammo Delivery.
