*Army Chemical Review (ACR)* (ISSN 0899-7047) is prepared biannually in June and December by the U.S. Army Chemical, Biological, Radiological, and Nuclear School (USACBRNS), Fort Leonard Wood, Missouri. *ACR* presents professional information about Chemical Corps functions related to chemical, biological, radiological, and nuclear (CBRN); smoke; flame field expedients; and reconnaissance in combat support. The objectives of *ACR* are to inform, motivate, increase knowledge, improve performance, and provide a forum for the exchange of ideas. This publication presents professional information, but the views expressed herein are those of the authors, not the Department of Defense or its elements. The content does not necessarily reflect the official U.S. Army position and does not change or supersede any information in other U.S. Army publications. The use of news items constitutes neither affirmation of their accuracy nor product endorsement.

Articles to be considered for publication are due 1 March and 1 September. Send submissions by e-mail to <leon.mdotacr@conus.army.mil>, or send an electronic copy in Microsoft Word on a compact disk and a double-spaced copy of the manuscript to Army Chemical Review, 464 MANSCEN Loop, Building 3201, Suite 2661, Fort Leonard Wood, MO 65473-8926. Due to the limited space per issue, we normally do not print articles that have been published elsewhere.

Articles may be reprinted if credit is given to *ACR* and its authors. All photographs are official U.S. Army photographs unless otherwise noted. *ACR* reserves the right to edit material.

PERSONAL SUBSCRIPTIONS are available through the U.S. Government Printing Office, P.O. Box 979050, St. Louis, MO 63197-9000.

UNIT SUBSCRIPTIONS are available by e-mailing <leon.mdotacr@conus.army.mil>. Please include the complete mailing address (including unit name, street address, and building number) and the number of copies per issue.

POSTMASTER: Send unit address changes to Army Chemical Review, 464 MANSCEN Loop, Building 3201, Suite 2661, Fort Leonard Wood, MO 65473-8926.

By Order of the Secretary of the Army:

RAY ODIERNO  
General, United States Army  
Chief of Staff

Official:

JOYCE E. MORROW  
Administrative Assistant to the  
Secretary of the Army

# U.S. Army Chemical Corps

## **Vision**

The Chemical Regiment is a unique, professional corps of chemical, biological, radiological, and nuclear (CBRN) warriors, world renown in countering the entire range of CBRN threats and hazards.

Our versatile Soldiers and leaders are fully networked in the CBRN enterprise and operate in full spectrum, capable formations to protect the Nation.

## **Values**

The Chemical Regiment is an innovative and adaptable force that is dedicated to meeting the CBRN hazmat needs of our Nation. We accomplish this by focusing on three priorities—taking care of our Soldiers, Civilians, and their Families; training as we fight; and maintaining our Regiment.

We are an enduring CBRN team that is committed to the profession of arms, Army values, Warrior Ethos, and the well-being of U.S. citizens.

We instill confidence in our national and international partners by providing credible CBRN technical expertise and remaining responsive and accountable to their needs.

We empower our people to do the right thing by encouraging candor and rewarding initiative. Although our professional CBRN family members are located in different organizations, we work together to accomplish the Chemical Corps mission.

## **Mission**

The Chemical Regiment conducts CBRN operations to protect national interests at home and abroad.

## **End State**

The Chemical Regiment is a professional corps of CBRN warriors—the world leader for CBRN and hazmat operations. It is capable of countering the entire range of CBRN threats and hazards, is equipped with enhanced CBRN capabilities to operate across the full spectrum of conflict, and is fully networked and integrated with the CBRN enterprise to protect the Nation and meet the challenges addressed in national strategies and guidance.

**The Chemical Corps Regimental Crest is a combination of the most historically significant symbols of the Chemical Corps. The Chemical Corps colors are shown on diagonally divided cobalt blue and gold background. The war-torn tree trunk in the lower left corner was taken from the 1st Gas Regiment's colors. The war-torn tree trunks of the barren no man's land were the only references chemical mortar crews had during World War I. The green dragon in the upper right corner is the current standard Chemical Corps symbol with which chemical Soldiers most readily identify. The mythological chlorine-breathing dragon was chosen to represent the first use of toxic gas, chlorine, in combat. The Chemical Corps motto, "Elementis Regamus Proelium" (We rule the battle through the elements) surrounds the crest.**
