

U.S. ARMY MANEUVER SUPPORT CENTER OF EXCELLENCE FORT LEONARD WOOD

Protecting Our Nation from the Heart of Our Nation

UNIQUE CAPABILITIES

Fort Leonard Wood is a thriving and prosperous installation which evolved from a small basic training post more than 70 years ago to a premier Army Center of Excellence, training nearly 80,000 military and civilians each year in active component courses.

Fort Leonard Wood is home to three U.S. Army schools: the U.S. Army Engineer; Chemical, Biological, Radiological, and Nuclear; and Military Police schools.

In addition to training these three specialties for the Army, we are one of three locations that provides gender-integrated in-processing and Basic Combat Training for new Soldiers.

On top of the nearly 80,000 trained in the active component courses, we train an additional 12,000 to 13,000 people from 120 reserve and other non-tenant units, and we are the proud home of the 102nd Training Division (Maneuver Support) and Missouri's 35th Engineer Brigade.

Fort Leonard Wood hosts and trains with the largest Marine Corps and Air Force detachments on any Army installation as well as a large Navy construction detachment.

We are home to the U.S. Army Corps of Engineers' Prime Power School and home of several deployable U.S. Army Forces Command units.

We are home to a large international student detachment — approximately 450 international students are trained each year. Over the past five years, Fort Leonard Wood has trained international partners from more than 100 nations.

Fort Leonard Wood solves tough future problems for the Army including solutions development for homeland operations and countering weapons of mass destruction.

MSCoE's and Fort Leonard Wood's goal is to train and develop Soldiers who are strong in character, competent in their tasks, and committed to our nation and our values.

UNIQUE INSTALLATION AND CAPACITY

Fort Leonard Wood encompasses around 62,000 acres of land and has four access control points, which experience 28,600 incoming and outgoing vehicles daily.

Just under 45 percent of the installation borders federally owned property, and there are no encroachment, environmental, or noise concerns.

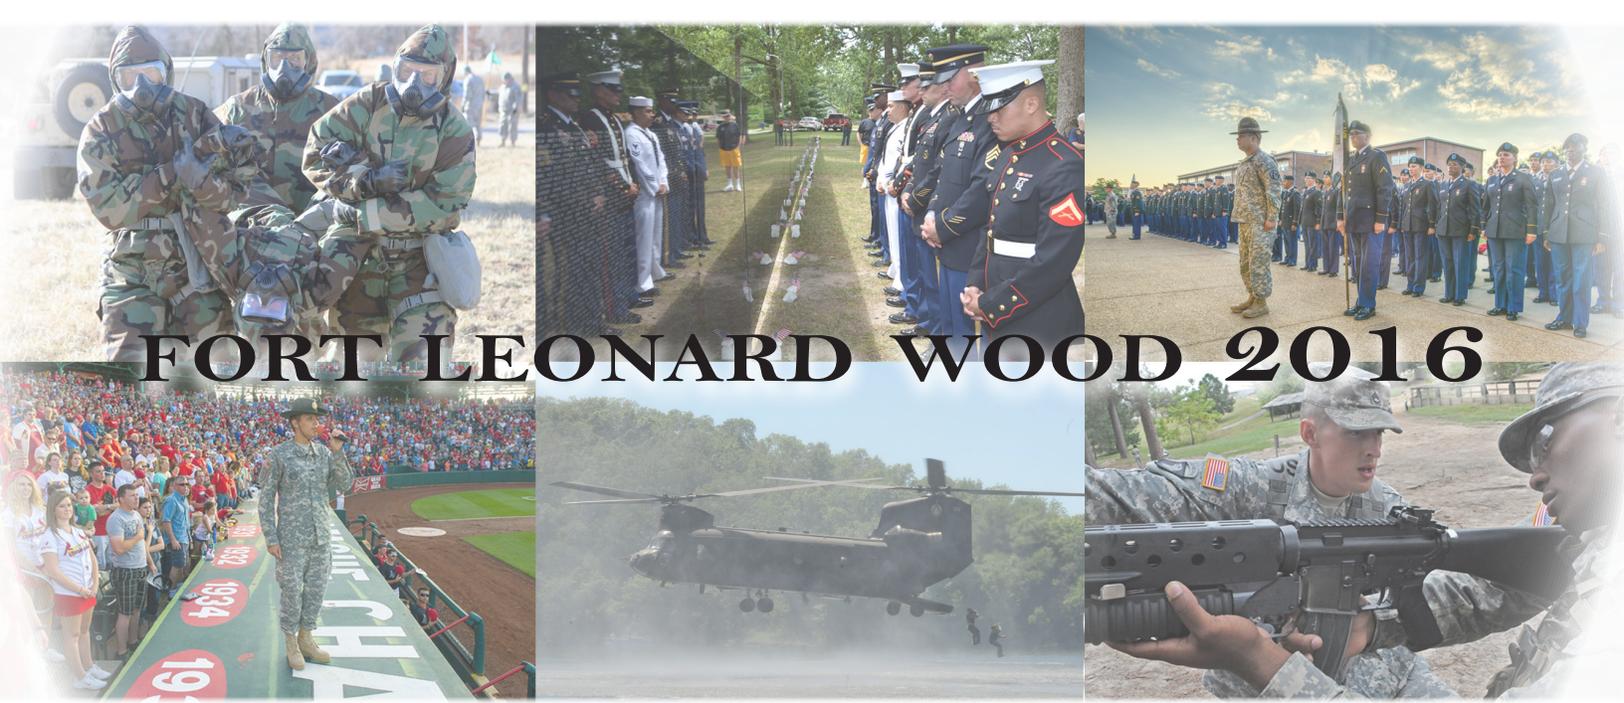

There are 2,355 buildings on post, providing 15.4 million square feet of facilities for our unique and highly technical training and support activities.

The installation has 35 ranges and 89 training sites; we manage about 55,500 pieces of equipment that support our training.

Barracks facilities, family housing and lodging have ample capacity for growth.

Forney Airfield also provides commercial and military service with 6,038 feet of available runway; 27.7 miles of railway are also available on post for the movement of equipment and training materials.

The General Leonard Wood Army Community Hospital provides a fully-accredited bedded hospital and currently accepts VA beneficiaries enrolled at the Harry S. Truman Veterans Administration Hospital in Columbia, Missouri.

FORT LEONARD WOOD 2016

ECONOMIC IMPACT TO MISSOURI

On an average day, Fort Leonard Wood has nearly 10,000 service members in training, employs or hosts more than 12,000 military and civilian employees, and supports over 11,000 Family members and about 49,000 retirees.

Fort Leonard Wood is Missouri's 5th largest employer, supporting 36,400 direct and indirect jobs. Our operating budget is more than \$450 million (which

includes civilian salaries), and we pay out \$998 million in annual military salaries to permanent party and Soldiers in training.

This year, our military construction program will also directly inject another \$141 million into the local economy.

We provide a beautiful installation and great diversity to the region as the communities provide unparalleled and

appreciated support to our missions and people.

We appreciate all that our community members do to support service members and Families, our post and the military.

If you have not been here, lately, please come and see our beautiful post and our unique capabilities, capacity and community support.

SOME THINGS WE ARE KNOWN FOR

- One of the largest TRADOC Centers of Excellence
- Low operating costs, low cost to train
- Joint presence and integration
- Multi-compo presence and integration
- Developing future solutions for complex problems such as IEDs, homeland operations, counter-WMD
- Capacity for additional missions
- Leader development: FLW Solarium, SHARP, Sisters-in-Arms
- Partnering with other installations for training exercises and outreach
- Partnerships with and high use of numerous higher education institutions for degrees, certificates and credentials
- Outstanding hospital with innovative practices including sharing agreements with VA hospitals
- One-of-a-kind lake recreation area
- Award-winning individuals and units – not only TRADOC, but AMC, IMCOM and others
- Providing a safe, low-cost, family-friendly environment with plenty of activities for service members, civilians, dependents and community members
- Outstanding social media presence

“Your job here at the U.S. Army Maneuver Support Center of Excellence is critical to developing our leaders and unique skills supporting formations anywhere around the world.” - Undersecretary of the Army Patrick Murphy
