# ATV Safety Tips

- ATVs are NOT toys, get training
- ATGATT: “All The Gear, All The Time”
- Never ride alone and always tell someone where you are going and when you will return
- Always supervise young operators
- Never carry extra riders
- Read the owner’s manual carefully
- Be careful when operating ATVs with added attachments; these affect the stability, braking and operation of the ATV
- Never operate ATVs on streets, highways or paved roads, except to cross at safe, designated areas
- Always make sure the ATV is in good condition; check tires and wheels, braking and steering regularly
- Check local laws
- Ride only in approved areas
