

Factsheet

Spill Kit Inventory Examples

A spill response kit must be kept at each facility that handles or stores POL products, hazardous materials, and hazardous waste. The kit should include, at a minimum, a 55-gallon steel or ply drum, absorbent materials, broom, and a dustpan. The kit must be stenciled with "Spill Kit" and must be placed in a designated area in which all building occupants are familiar with the location.

Examples of Items for Spill Kits

-  Shovel, Non-sparking
-  Gloves, Rubber
-  Goggles, Splash-proof
-  Loose Absorbent, Floor Dry
-  Absorbent Socks
-  Absorbent Pads
-  Trash Bags
-  Drum 55 Gallon, Empty
-  Overpack, 95 Gallon
-  Cones and/or Tape for blocking the spill perimeter
